BENCH TEST REPORT · SAVED RECORD · OFFLINE REVIEW (HISTORICAL)

HMI operator trial, first attempt (stopped early)

Live PLC evidence | Stopped before completion | Historical record | `portal-20261103231427237-1`

Summary

Generated from the campaign record; no additional model call

- Run stopped early after 13 s, before any experiment reached a conclusion.
- No test plan or experiment was recorded.
- No requirement verdict was recorded; experiments report observations only.
- No finding was recorded.
- Separate review files attached: s2-audit.json (partial).

CAMPAIGN EXECUTION

Recorded run status

Stopped before completion

EXPERIMENTS

No test plan recorded

0 Planned
0 Observed
0 Inconclusive
0 Not run

REQUIREMENT VERDICTS

None recorded; experiments report observations only

0 Pass
0 Fail
0 Inconclusive
0 No verdict

FINDINGS

Engineer review state in the campaign record

0 Recorded
0 Unreviewed
0 Accepted

MUSE ACTIONS

Tool calls, counted by outcome

0 Applied
0 Refused
0 Timed out

Needs attention

> Run stopped before completion. Paused: Connector stale; inspect evidence before recovery → Stopped: S2 campaign ended; retain original observations

> Model request request-1 (planning) cancelled; a response was returned but its decision was not applied.

Execution

Paused: Connector stale; inspect evidence before recovery → Stopped: S2 campaign ended; retain original observations

Finalization note WRITTEN BY THE RUNTIME, NOT BY MUSE

> S2 campaign ended; retain original observations

Identity and source

Live PLC evidence

Campaign	`portal-20261103231427237-1`
Report title	HMI operator trial, first attempt (stopped early)
Machine	*Name not recorded in the campaign record; identified by the specification and I/O map below*
Evidence class	Live PLC evidence
Report source	Saved record · offline review (historical)
Started	2026-11-03 23:14:37.995 UTC
Ended	2026-11-03 23:14:51.356 UTC
Duration	13 s
Controller build	`8001/interface-1/sha256:6c2a1eb6c9c83485b75cb9bcefc1be237a94c8727ecf8098ad57a4d680516628`
World module	`sha256:277992048f8ca9a8b36f2f90c0d4c33ef479cb8b3c355d6a2233a272850698f5;worldVersion:0.5.0;loaded-by-child:23868`
Specification	`sha256:acd1e39619af301155ac0f8b81f4b824c36c478800b4d482ddb225a2a21d5185`
I/O map	`f8c30539e336f55056f73d4d7ef467b10a9175a60dec3ec156ba1a7bb7a7ba80`
Model	`muse-wonder-1.0`
Connector	`m8-opcua-v1/m8-conveyor-1.0.2;controlsbench.wonder-process.v1;child:a6e555e92a34d4ce`
PLC boot identity	`1787886077538`
Authorized scope	normal, faults · known diagnosis

Claim boundary: Wonder-directed M8 campaign through the runtime owner's verified isolated adapter. Scope-limited experiment evidence; no certified controller coverage. HMI frames remain separate.

Test scope and results

No test plan recorded

No test plan or experiment was recorded before this run ended. Nothing in this record was tested against a requirement.

Findings

Recorded by Muse; observed values are exact PLC outputs, inference is unverified

No finding was recorded in this campaign.

HMI behaviour

0 HMI actions recorded; 1 frame captured, 1 of them supplied to Muse; 0 assessments recorded.

Screenshot capture and supply to Muse are separate: each frame states whether its pixels were actually sent to Muse. Assessment verdicts are Muse-authored; any separate review is listed with its own status.

No HMI assessment was recorded in this campaign.

▼ All captured frames (1; 1 supplied to Muse)

Frame	Captured	Supplied to Muse	Image
`#43 vision-1-current`	2026-11-03 23:14:38.075 UTC	Pixels sent to Muse in request-1 (model exchange log)	Not selected for this report; metadata only

Recommended next checks

RECOMMENDATIONS GENERATED FROM GAPS IN THIS RECORD · NOT TEST RESULTS

1. Resolve the stop cause and re-run: Paused: Connector stale; inspect evidence before recovery → Stopped: S2 campaign ended; retain original observations
2. Re-run the campaign to obtain a recorded test plan; nothing was tested in this record.

Remaining work, missing evidence and limits

Scope limits

- Wonder-directed M8 campaign through the runtime owner's verified isolated adapter. Scope-limited experiment evidence; no certified controller coverage. HMI frames remain separate.
- Experiment evidence only; no final conveyor-controller requirement coverage is certified.

Final recorded PLC and connection state

historical

Last PLC output recorded in this campaign, at 2026-11-03 23:14:51.336 UTC. Historical: this report does not monitor current PLC state or freshness.

PLC output recorded	2026-11-03 23:14:51.336 UTC (source 2026-11-03 23:14:49.894 UTC)

PLC cycle	12619
PLC boot identity	1787886077538
Connector state	stale — PLC ConnectorStale=true at applied 106506730774873/110; last confirmed image retained. An outstanding transport operation may still complete; reconcile before reuse. (recorded 2026-11-03 23:14:51.342 UTC)

Usage and accounting

Reservations and estimates, not invoices

Budget reservations

This campaign	$5.00
Session total (includes earlier campaigns)	$110.00
Held for planning	$5.00

Conservative reservations are admission accounting held before each model request. They are not spend and not an invoice.

Model token usage (as reported per request)

Model requests	1 (1 cancelled)
Input tokens	16,865

of which cached	0
Output tokens	1,278
of which reasoning	677

Token-cost estimates

Estimate at uncached list rates (1 of 1 requests priced)	≈ $0.0930
Estimate stated in s2-audit.json	≈ $0.0930

Token-cost estimates use the pricing recorded with each request (4/20 USD per million input/output tokens, checked 2026-11-01). Estimates, not the invoice; caching and billing can differ.

Separate review artifacts

Not part of the model report; status and origin shown as recorded

▾ `s2-audit.json` offline audit status: partial

Separate offline audit of the saved evidence. Not part of the model report; it does not change any recorded conclusion.

Recorded	2026-11-03 23:18:49.536 UTC
File SHA-256	`6b6d4ae49955dcb79547106969dc62bf1855f9bc6d927a4f1830f886f349dd59`
Original evidence hashes verified	8
Paired tool results	0
Exact PLC finding claims checked	0
Images verified	1
HMI actions verified	none
Expected HMI actions missing	start, stop, reset
Expected assessments missing	UI-01, UI-02, UI-03, UI-04
Model requests	1
Recorded failures	none
Final recorded PLC state clean	yes
In-flight commands at close	none

Claim boundary	Exact frames were sent to Muse; trusted browser inputs, rendered outcomes and PLC acknowledgements are preserved. Pixel interpretations require separate review; inconclusive UI coverage remains inconclusive.
